

CTG Remote Test Centre

Today's companies face keen competitive pressure to develop high-quality, reliable and cost-effective IT solutions.

Because Structured Testing provides insight into the risks involved in every stage of a project, it is a critical element in developing and deploying the applications your business requires.

Testing is Your Concern, but it is Not Your Core Activity ?

Very often IT organizations are aware of the possible benefits of Structured Testing but investments in people, tools, techniques and methodologies to support the Testing process are either postponed or cancelled.

Indeed, emerging technologies, shorter release cycles and market dynamics drive organizations to focus on their core competencies and rely on service providers to manage critical but non-core processes.

If testing is your concern but it is not your core activity, you should consider the use of an offsite Test Centre for your Testing activities.

The CTG Solution

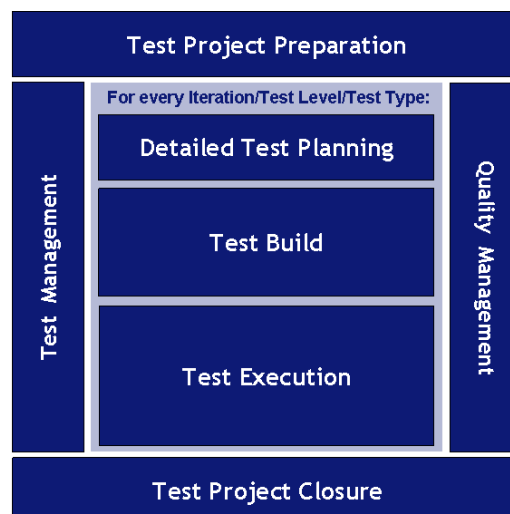

CTG's Test Centre has the expertise, the necessary facilities and the adequate tools to do your testing for you.

CTG's Test Centre is located in Diegem and the facilities include:

- Access controlled test lab
- Wide variety of the most common configurations
- Highly maintainable test environments
- A full set of pre-installed test tools (record and playback, test management, defect tracking and performance management)
- Video conferencing and conference call facilities
- Virtual Private Network connection to your offices

The CTG Approach

At CTG, we developed a unique approach to manage your test projects in our Test Centre.

Our Commitment to Quality

*CTG ensures the consistent delivery of the highest-quality services through proprietary best practices formally defined in our global quality system. CTG is among the first in our field to have designed and implemented a comprehensive **Total Quality Management Program**. This program guides our employees worldwide in qualifying opportunities, delivering projects on time, hiring the right professionals, and ensuring that client requirements are fully satisfied.*

The objective of the **Project Preparation** phase is for you and CTG to have a clear and corresponding view of the assignment.

During the **Test Assessment** phase, CTG obtains a precise understanding of your requirements. Together with you, the test strategy is determined and described in a test plan.

In the **Test Design** phase, CTG prepares the tests by defining test cases and test scenarios.

The test data and objects are prepared and the test scenarios are executed during **Test Execution**. This phase includes reporting, management of the test results and repetition of the tests. As a result of this phase, CTG will advise you on the risks associated with the implementation of the system.

Finally, during **Project Closure**, CTG will evaluate together with you the project and its results. Only after you have indicated your satisfaction through a formal sign-off, we will consider our work done.

Your Benefits

Working together with CTG's Test Centre will :

- Save costs
 - Through increased efficiency ;
 - No need to invest in multiple test platforms ;
- Result in faster time to market ;
- Allow you to focus on your core activities ;
- Give you access to leading testing practices and expertise ;
- Increase the quality of your product.
